hello@sprung.co.za

The mobile kitchen is durable to the elements and can be positioned anywhere for ultimate outdoor kitchen and dining experience, doing away with the need for constantly running back and forth between the kitchen and the outdoor entertainment area.

Simply connect to your outside tap, or run off a drum. The sink can be filled with ice and used as an ice-bucket for your drinks, or as a prep bowl.

A gas burner can be used on the surface to create a fully functional kitchen. Optional extras include a Garapa hardwood slatted shelf, with stainless steel fittings, to ensure no rusting. Also on offer are a clip-on metal shelf for accessories or herbs to hand, hardwood crates to house and move anything you may need when outdoors, and a butcher's block which can slot into the frame under the counter when not in use.
